

**Step 1**

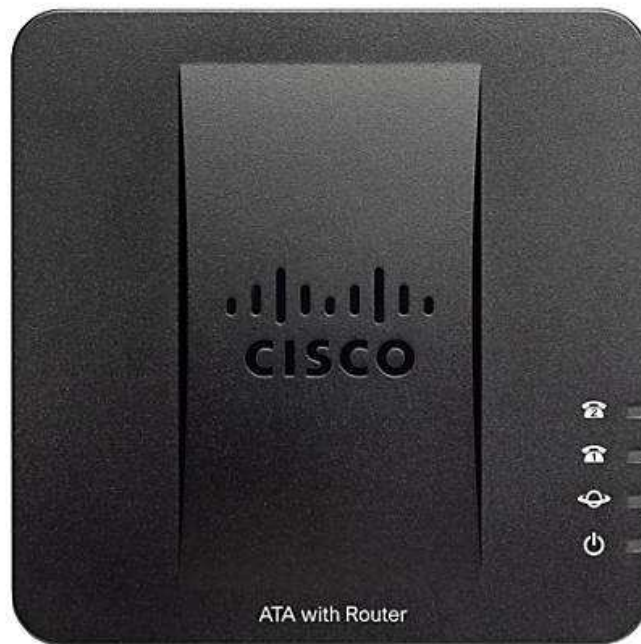

Below is how to connect the back of the Cisco SPA122 to your phone, power and cable modem or optionally in the back of your router.

If not using a router: The ethernet cable should be inserted into the blue internet port on the back of the Cisco SPA as shown and run to your cable/dsl modem Lan port.

If using a router: The ethernet cable is connected between one of the yellow Lan ports on the back of the router and the blue internet port on the Cisco SPA 122. Then an ethernet cable from your cable/DSL modem into the blue internet port on the back of your router.

**Step 2**

Wait 5 minutes, once it is setup you should see the bottom 3 lights on the front of the Cisco SPA 122 light up green. This includes the 1 Telephone, planet symbol and the power symbol.

**Step 3**

You should be able to make calls on your phone now. If you are having troubles don't hesitate to give us a shout on our webchat, phone or by email.
